

BLOODBORNE PATHOGEN (BBP) TRAINING INSTRUCTIONS

Dental Professionals is required to give bloodborne training to Dentists, Dental Hygienists, and Dental Assistants on initial hire and annually thereafter. Dental Professionals has put together these training links to comply with the regulation. If you prefer to come into our office to take the mandatory training please call us to make an appointment. You will be paid one hour minimum wage when you complete the training. You will need to complete and submit a time sheet with your certificate of completion to receive your payment check.

Instructions:

- 1) This training must be performed during Dental Professionals office hours so should you have any questions about the content or Dental Professionals policies you will be able to contact us.
- 2) The [**BBP Training Presentation**](#) is a power point presentation. Each slide should be reviewed as well as the notes under each slide. There is also a tab for outline notes for each slide. As you follow the program, many items including laundry protocol, location of sharps containers, location of personal protective equipment, etc. will be specific to the temporary employer. These slides will provide general training about virus transmission, general exposure precautions, etc., while the temporary employer will provide site-specific training upon your initial site visit/orientation.
- 3) A copy of a sample [**BBP Site Specific Checklist**](#) that Dental Professionals will expect temporary employers to follow is available on this link. Please review this checklist so you are familiar with what type of site-specific items should be covered by the temporary employer.
- 4) When you are finished with the training module, fill out the [**BBP Certificate of Completion**](#) to document you received BBP training and submit it along with your time sheet to:

Dental Professionals
4700 42nd Ave. SW, Suite 460
Seattle Washington 98116-4589

A complete copy of Washington State Chapter 296-823 WAC Occupational Exposure to Bloodborne Pathogens is available at: www.lni.wa.gov/safety/rules/chapter/823/
